

Case Study: Jane Systems and Belfast Metropolitan College

THE BIGGEST AND THE BEST

At any given time 37,000 students will entrust their futures to **Belfast Metropolitan College**, Northern Ireland's largest and most prestigious further education provider. This fine institution, which excels in the delivery of both academic and vocational courses, sets high standards for its students, its staff and its partners. Belfast Met first chose Jane Systems as a service partner in 2002 and the relationship has grown stronger with each passing year. HR Manager **Shirley Cleary** has no doubt about the reasons why:

We have used Jane products since 2002 and I can say that it has transformed the way we do business.

One stop data source which allows us to store all our employee information, real-time information which allows for quick decision-making and automation of processes which reduces errors and improves efficiency.

The flexible extensions have also allowed us to integrate several of our own systems into JANE.

What I most like about JANE is their pro-active and innovative approach to business, they are always evolving and are keen to introduce new technologies to deliver for their clients.

A professional company with a real commitment to provide excellent technical expertise and incredibly good customer service.

Thanks guys

Sincere thanks to you too, Shirley. We're proud to work with you.

Jane Systems – if it matters to you, it matters to us
