

Case Study: Jane Systems and Spectrum ASD

THIRTY YEARS OF CARING

Promoting active healthy lifestyles for adults.

Delivering the security of residential care, respite and education for children.

For three decades, **Spectrum ASD** has been a leading light in the care of and respect for people of all ages on the autistic spectrum.

With a wide range of locations, employees and administrative requirements, Spectrum's system requirements are complex. As a not-for-profit organisation it's essential that money is well spent, and equally important that suitable staff are recruited, trained, developed and, of course, accurately paid.

James Dumbleton, Spectrum ASD's Payroll Manager is very clear on the value Jane software adds, and how this value ripples out to Spectrum's clients and the wider community:

"We have been using Jane for over 7 years and the main selling point for Spectrum is the ability to drill down into the information contained within Jane at a far deeper level than other payroll providers we've seen. This is particularly valuable when you operate multiple locations with many different types of employee and pay scenarios, across a large range of cost centres. The ability that the user has to modify fields within Jane is extremely useful and the ability to create such a vast range of queries/reports is very impressive"

We're proud to be associated with an organisation that champions support and respect, and does so with the highest level of professional diligence. Spectrum ASD are doing well by doing good. It's our privilege to help them.

Jane Systems – if it matters to you, it matters to us
