

## Case Study: Jane Systems and Ventrus Multi-Academy Trust

### SERVING THE NEXT GENERATION

It's highly reassuring to see the vigilance and commitment of Britain's educators up close. **Ventrus Multi-Academy Trust** comprises twelve schools spanning the South West of England, and their standards and performance are impeccable.

Consistently strong Ofsted reports highlight the professionalism and attention to detail of individual schools, and of the trust as a whole. Ventrus is a winning team in a highly scrutinised field, so when they take on new service partners their expectations are high.

When Jane Systems installed the Self-Service and Authorised User portal, the Ventrus team showed the same commitment to new technology as they do to every other aspect of their work.

Financial Accountant **Richard Herbert** was central to the implementation and quickly saw the benefits:

***Our staff quickly adapted to using the portal for reviewing and amending personal details as well as being able to access, print and download payslips and P60s themselves 24/7. This has resulted in the reduction of the use of change forms and has saved the Trust and our staff time re-issuing payslips for example. A number of colleagues have remarked positively about being able to access their payslips on mobile devices and this has worked much better for us than our previous system of emailing out payslips.***

The self-service portal offers a platform for improvement in a wide range of areas. Our goal is to help clients in the areas that matter to them.

**Jane Systems – if it matters to you, it matters to us**
